Application for an internship

Dear Sir or Madam,

I am a student in first year of engineering school in digital sciences at ENSEEIHT school in Toulouse, France. I would like to offer my services as an intern during the period from July 24th to August 19th 2023.

In the context of a trip to Japan, I am looking for an internship that covers a period of four weeks. I am skilled with my hands, and I am invested in the tasks I am given. I am fluent in English and have some basic Japanese.

I would like to do this internship in order to enrich my culture about Japan and to discover the Japanese professional world, to develop my personal and professional adaptation abilities in a country where the main language is not my mother tongue.

Thanking you for your attention to my application, I remain available for an appointment / interview if you wish to meet me personally.

I look forward to hearing from you.

Benjamin Schlögel
